

June 13, 2019

The SNF PPS Patient Driven Payment Model (PDPM) relies on accurate coding of several MDS Section GG mobility and self-care items that impact the PT, OT, and Nursing component per-diem case-mix payment rates. On June 7, 2019, the Centers for Medicare & Medicaid Services (CMS) released a series of short videos to assist providers with coding select Section GG items on the OASIS, IRF-PAI, LTCH CARE Data Set, and the MDS. These videos, ranging from 4-12 minutes, are designed to provide targeted guidance using simulated patient scenarios. These videos review GG0110. Prior Device Use with Information From Multiple Sources, GG0130 Self-Care, GG0170 Mobility , GG0130B Oral Hygiene and GG0170C Lying to Sitting on side of bed. To access these videos, click [here](#).
