

October 17, 2019

The CDC will host a free webinar on Preventing the Spread of Novel or Targeted Multidrug-resistant Organisms (MDROs) in Nursing Homes through Enhanced Barrier Precautions on Thursday, October 24, 2019 from 2:00 pm – 3:00 pm. The CDC recently introduced a new approach called Enhanced Barrier Precautions to help address the challenges in caring for residents with MDROs in nursing homes. Enhanced Barrier Precautions are recommended for preventing the transmission of novel or targeted MDROs in nursing homes involved in a public health containment response. Enhanced Barrier Precautions fall between Standard and Contact Precautions, and require gown and glove use for certain residents during specific high-contact resident care activities that have been found to increase the risk for MDRO transmission. During this COCA Call, clinicians will learn about Enhanced Barrier Precautions, with a detailed discussion of the residents and high-contact resident care activities for which they apply. A few minutes before the webinar begins, please click the link below to join: <https://zoom.us/j/535497188> or join by Telephone: (646) 876- 9923 or (669) 900-6833.

Webinar ID: 535 497 188. Pre-registration is not required.
