Safe Care Transitions During COVID 19

Cohort 5 Session 12

February 18, 2021 12:00 pm

> Please note, Project ECHO collects registration, participation, questions/answers, chat comments, and poll responses for some ECHO programs. Your individual data will be kept confidential. These data may be used for reports, maps, communications, surveys, quality assurance, evaluation, research, and to inform new initiatives.

Today's Agenda

Follow-up from Session II – Interprofessional Team Management and Monoclonal Antibody Treatment

Safe Care Transitions

Case Study and Break Out Rooms

Performance Improvement Discussion

Wrap-up and Poll

Questions & Answers

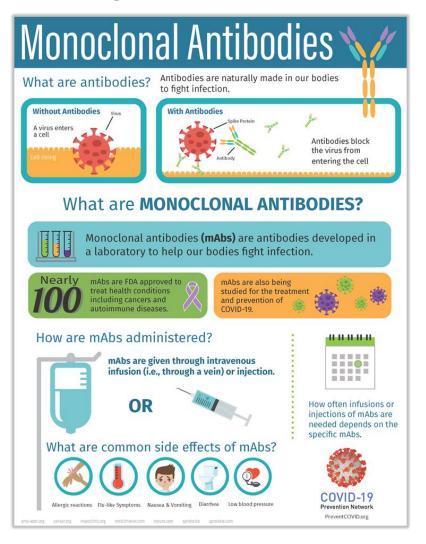

Session 11 Follow Up

Safe Care Transitions During COVID 19

Transition of Care Defined

- A transition of care is defined as the movement of a patient from one setting of care (hospital, ambulatory primary care practice, ambulatory specialty care practice, long-term care, home health, rehabilitation facility) to another.
 - Center for Medicaid and Medicare Services

- Hospital to SNF
- SNF to Hospital
- SNF to Home
- SNF to SNF
- Between Units

DPH Regulations: Hospital to Nursing Home

- When a resident is transferred to a hospital for evaluation of any condition must accept the resident's return to the facility when the resident no longer requires hospital level of care.
- Shall not condition admission or return to the facility on COVID-19 testing or COVID-19 test results.
- If a test is not performed before discharge, facility should test the resident upon admission, if a test is available.
- Awaiting the test results should not delay discharge from the hospital to the long-term care
- Newly admitted or readmitted residents returning from any setting outside of the facility who are not recovered from COVID-19 within the previous six months
 - o should be quarantined in a private room or, if unavailable, placed in a room with another resident who is recovered (less than six months from infection), in a dedicated quarantine space
 - monitored for symptoms of COVID-19 for fourteen days after admission

DPH Admission Freezes

Does not apply to a resident transferred from the facility to a hospital or other healthcare facility.

CMS Regulations

Hospital to Nursing Home

- Can accept a resident diagnosed with COVID-19 and still under Transmission Based Precautions for COVID-19
- Should admit any individuals that they would normally admit to their facility
- If possible, dedicate a unit/wing exclusively for any residents coming or returning from the hospital.
- Quarantine 14 days with no symptoms

Nursing Home to Hospital

 Residents who require transfer to a hospital - facility alerts EMS and hospital of the resident's diagnosis (suspected or confirmed COVID-19) and precautions to be taken by transferring and receiving staff

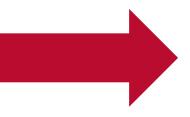

Care Transitions Programs and Toolkits

- BOOST (Hospital Based)
- ProjectRED (Hospital Based)
- INTERACT (Nursing Home Based)
- OPTIMISTIC (Nursing Home Based)
- RAFT (Nursing Home Based)

Effective Communication

Never More Important Than Right Now: Case Study

- Mr. Jones admitted to the facility in June 2020 with diagnosis of Stage 3 pressure ulcer, COPD, Major depressive disorder, Chronic Respiratory Failure, morbid obesity, osteoarthritis. He was admitted due to severe debility, requiring assistance with care needs, and was unable to get of bed by himself.
- Physician's order on 6/19/2020 for bilateral upper side rails on the bed and a side rail consent signed by resident on 6/29/20 to use bilateral upper side rails as an enabler and that side rails were recommended as part of the plan of care. Reassessment of use of side rails was completed on 12/10/20.
- Mr. Jones left the facility 12/25/20 on a social leave and upon his return was transferred to the quarantine unit.
- During personal care by the CNA on 12/28/20, resident attempted to roll onto his side in bed by throwing his leg over but because of weight, he lost control and fell of the bed. During the facility investigation, it was noted that resident's bed in the quarantine unit did not have bilateral upper side rails

Why Effective Communication During Care Transitions Matter

- Resident Outcomes
 - Hospital Admission or Readmission
 - Falls
 - Medication Errors
 - Delirium
- Facility Outcomes
 - Survey implications
 - Quality Measures
 - Health Care System partnerships (would you say this differently?)

QI: Safe Care Transitions Process

Describing a Process

https://www.youtube.com/watch?v=Ct-IOOUqmyY

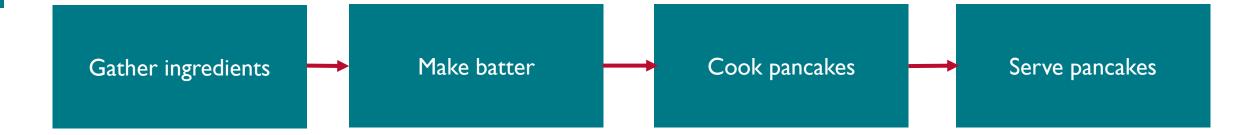

Make pancakes for breakfast

Who: Brian

When: Night before

Where: Kitchen

What: Flour, eggs, milk, yeast, salt, sugar, (spices), measuring

cups and spoons, bowls

How: Measure out

everything

Who: Brian

When: Night before

Where: Kitchen

What: Ingredients, mixing

bowl, whisk, fridge

How: Whisk dry ingredients,

add wet ingredients, rest

overnight in fridge

Who: Brian

When: Morning

Where: Kitchen

What: Batter, stove, nonstick pan, butter measuring cup +

pan, butter measuring cup

spoon, spatula, plate

How: Heat pan, add I tsp butter, add .25 cup batter.

Cook until both sides golden,

flipping once

Who: Brian

When: Morning

Where: Kitchen

What: Pancakes, maple syrup, butter, plates + utensils, coffee

How: Put pancake on plate, add butter and maple syrup

PRN

Breakout Session:

How Might We: Improve Communication When There Is A Care Transition During COVID 19?

- Group I: SNF to Hospital Transition
- Group 2: Hospital to SNF Transition
- Group 3: Unit to Unit Transition

Breakout Session Activity

- Describe the process for information transfer between settings/units
 - High Level Flowchart
- Draft a safe care transition checklist
 - Be sure to include COVID specific information

Report Out

How did you do?

SNF to Hospital Transition (Group 1)

Who – nursing, MD Where – unit When – significant change How – assessment, interact, sbar What – assessment, interact, sbar, molst Who – nurse
Where – nurses'
station
When – after decision
to transfer
How – looking up
phone number and
calling
What – face sheet,
phone

Who – nurse
Where – nurses'
station
When – after calling
family
How – call to referral
hospital
What – phone,
assessment,
precautions

Who – medical secretary, nurse Where – nurses' stn When – after calling hospital How – call transport service What – phone, precautions, covid status, type of transport

Who – EMTs, front desk, nurse
Where – front desk to floor
When – after arrival of EMS
How – EMS seen to floor, handoff w/ nurse
What – paperwork, patient

Hospital to SNF Transition (Group 2)

Post arrival

Who -Liaison/Admissions Coordinator When – Automatically from Hospital Where - Hospital What – Clinical Information How - Electronically

Who – Liaison determines based on building standards When - ASAP, building guidelines Where - Field/Building/ **Bed Location** What – Clinical needs skillset/equipment How – email/discussion Who – Liaison/DON When – Real time Where – all scripts What -Yes/No answer after eligibility How -Electronically/phone/ email

Who – Liaison alerts nurse manager When - After confirmation of accepted referral Where - Neighborhood where admit goes What – Hospital records/orders/facesheet How – paper or electroninc

Who – Admissions Coordinator/Nurse Manager When – X hours before admission Where – On the neighborhood What – Bed. Equipment, initial CP How – In-person

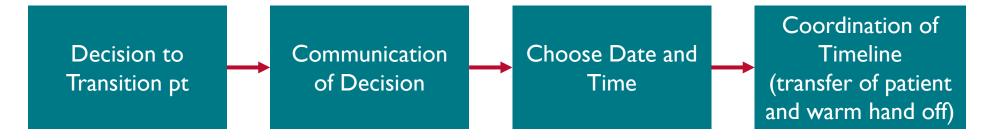

Unit to Unit Transition (Group 3)

From COVID to non-COVID unit

Who - Infection control nurse, provider, ED, infection control team
When - day 14 after positive test and w/o symptoms
Where - COVID unit
What - decision
How - guidelines and clinical assessment

Who – Interdisciplinary
Team
When - I-2 days
before transition
Where - COVID unit
or conference room
What - decision
How - verbally, memo
in mailboxes,
documentation in
record

Who – social service, nursing, DON, IDT Where - regular meeting What - date and time How - depends on availability of staff

What to expect next...

Next Session: February 25, 2021

Topics:

Session 13: Safe Visitation and Reopening

Send in your facility's best practices/challenges to Brenda Chen at bchen@maseniorcare.org

Wrap Up and Poll

• Please watch your screen and respond to our 2 poll questions as they launch
