

The Role of the CNA during COVID-19

Cohort 8 Session 10

February 5, 2021

11:00 AM

Please note, Project ECHO collects registration, participation, questions/answers, chat comments, and poll responses for some ECHO programs. Your individual data will be kept confidential. These data may be used for reports, maps, communications, surveys, quality assurance, evaluation, research, and to inform new initiatives.

Today's Agenda

Vaccine Clinic Check In

The Role of the CNA during COVID 19

Discussion

Performance Improvement Discussion

Wrap-up and Poll

Questions & Answers

Vaccine Clinic Check In

The Role of CNAs During COVID 19

Chat Waterfall

- We will ask you **two questions** about how we might leverage the expertise of CNAs in COVID 19 efforts
- Rapid generation of ideas
- Everyone participates
- Captures “wisdom of crowd”

Last Name Between A-K

- Type your response to the question below
- Respond “Everyone”
- Wait until I count you down (DO NOT HIT SEND UNTIL I TELL YOU TO!)
- Here is the question:
 - What are the biggest challenges CNAs face during COVID -19?
- 3-2-1 BEGIN

Last name between L-Z

- Type your response to the question below
- Respond “Everyone”
- Wait until I count you down (DO NOT HIT SEND UNTIL I TELL YOU TO)
- Here is the question:
 - How might we respond the challenges just described?
- 3-2-1 BEGIN

Role of the CNA during COVID-19: Challenges

- CNA shortages are magnified
- CNAs take on new responsibilities
 - Isolation requires CNAs to deliver food at mealtimes
 - Do the resident's laundry
 - Disinfect every room
- Keep residents feeling safe and secure (with less physical contact and more physical barriers)
- Try to keep residents connected to family and community (with more technology and less time)

What CNAs say they need...

- Include CNAs as an essential team member in care plan meetings, daily huddles, and with clinical and regulatory updates about COVID
- Realize that being a CNA is the REAL and valued profession
- Communicate to CNAs to allay fear and build a culture of trust
- Invest in CNAs
 - Provide growth opportunities and education beyond mandatory in-services
 - Beyond compliance, their profession, their development, their skills

Case Study

Doreen has been a CNA in your center for three years. She has been working on the COVID 19 positive unit for the last couple of months and has helped orient all CNAs who are new to the unit.

At the end of her shift yesterday, Doreen reported that she had noticed that several staff members on the unit were not using proper hand hygiene practice. She thinks this is occurring because CNAs and nurses are both doing tasks they don't usually do. She has some thoughts on how this problem can be fixed.

- How can the Unit Manager empower Doreen to help resolve this problem?
- What are some potential barriers that Doreen might encounter?
- How might the leadership team help overcome these barriers?

Leveraging CNAs to Improve Infection Control

- How can you ensure that CNAs are part of ongoing training and updates on Infection Control practices?
- What are some ways in which CNAs can contribute to Infection Control audits and process improvement?
- What are examples of processes that support CNA communication about a change in resident condition or about what matters most to the resident?

Let's design a process!

Martha Hayward

Training Hub Logo

4 Box Flow Diagram

(for Proper PPE use)

Who is responsible for enough equipment.
Where is the equipment stored.
When is the equipment inventory done.
How is the equipment supply verified.
What is done when something is missing.

Breakout rooms

- 10 minutes
- Describe what you are designing in 2-5 words
- Create high level flow diagram of chief components
- Choose one component to define attributes:
 - Who – What – When – Where – How

Choose your area of interest

Trauma/Isolation

Falls

Infection Control

Wounds

Report out

- How did it go?

Segmentation

How to make your improvement life easier

Segmentation—or how to eat the elephant one bite at a time

- Segmentation—trying out your test of change under the most favorable conditions
- Early, easy wins help build momentum—celebrate them!
- Allows you to learn and build confidence in the change before testing in difficult areas
- Different segments will yield different results = accelerated learning

Segmentation examples

- Day shift vs. weekend or night shift
- Staff eager to try something new vs. the more reluctant
- Better staff unit vs. unit with staffing shortage

Leave in action

- Which segment do you choose for your first tests?

Next week

- Our first small test of change

What to expect next...

Next Session: **February 12, 2021, 11:00AM**

Topic

- Session 11: Interprofessional Team Management of Mild Cases of COVID-19

Send in your facility's best practices/challenges by Tuesday, February 9th to Tabitha Fineberg at tabithafineberg@hsl.harvard.edu

Wrap Up and Poll

- Please watch your screen and respond to our 2 poll questions as they launch
